

Changes to Educational Service District (ESD) Certification Offices

As of July 1, 2014, ESDs offering certification services have been limited. Due to fiscal changes and constraints some ESDs have elected to close. Other ESDs will remain open through inter-local agreements and funding provided by local school districts. Individuals and districts not covered by their local ESD agreements will be assessed a service charge.

Even though some ESDs will not retain a certification office, all ESDs will continue providing fingerprint services.

ESDs retaining a certification office:

- ESD 112
- ESD 113
- ESD 114
- ESD 123
- ESD 171

(Individuals and school districts not covered within their local ESDs listed above will be assessed a service charge of \$45)

- ESD 105

(Individuals and school districts not covered within their local ESDs listed above will be assessed a service charge of \$100)

All applicants seeking assistance from their local ESD should contact the ESD certification office to determine if their district is a member covered by an inter-local agreement to avoid delays in certification processing.
