2:00 – 2:30

4. Next Steps
 - a. White paper
5. SSAC
6. 2017 – Safety Summit #2 – TBD

2:30 - Close & Adjourn

NB:

- School Safety and Security - natural and manmade disaster preparedness, “implementation” and recovery isn’t adequately funded.
- School Safety and Security includes the Mental Health of our students and there are significant gaps in both services and funding.
- We lack the ability to plan, coordinate and communicate K-12 school safety and security initiatives with a high degree of fidelity internally with K-12, and with our external agency stakeholders.
- School districts, especially smaller ones, can’t meet legislative mandates without additional help. Sending more money to school districts doesn’t necessarily address this problem.
- The state’s school safety review should be comprehensive enough to include “today’s” (December’s discussion) topics.
- Pending the completion of the state’s safety study, many of the state’s legislative mandates relating to school safety should be part of “basic education” funding.

Special Thank You to
[WIAA](#) for hosting the School Safety Summit.2, and
[Clear Risk Solutions](#) for providing today’s refreshments.
