PURPOSE/BACKGROUND

This bulletin provides Home/Hospital (H/H) Instruction Program procedures to determine student eligibility and reimbursement. Districts, charter schools, and tribal compact schools maintain responsibility to provide H/H services based on students' needs and board policy.

Eligibility for H/H services is determined by the district, charter school, or tribal compact school based on the requirements found in Washington Administrative Code (WAC) [392-172A-02100](#) and guidance provided in this bulletin and its attachments.

HOME AND HOSPITAL ELIGIBILITY

H/H is provided to students enrolled in a public school who are temporarily unable to attend school for an estimated period of four weeks or more because of a physical and/or mental disability or illness.

For the 2021–22 school year, with the expectation that most students will return to in-person learning per [Bulletin #0341](#), eligibility criteria for home/hospital reimbursement will include students unable to attend school in person.

Students residing at Seattle Children’s Hospital do not qualify for H/H services. Seattle Children’s Hospital is directly funded by the Office of Superintendent of Public Instruction (OSPI) to provide an educational program for their hospitalized students.

H/H services are limited to a maximum of 18 weeks per school year per student. Weeks of absences may be consecutive or intermittent but may not exceed the 18-week limit. To qualify for H/H services on an intermittent basis, the total expected school days of absences must be at least four weeks, but the time that the H/H services begins and ends is no more than 18 weeks.

Students caring for an infant or relative who is ill are not eligible for H/H services. H/H services are not provided during school vacations unless students are enrolled in a summer school program. H/H services cannot begin for a student if less than four weeks of school remain.

PROCEDURES TO REQUEST HOME AND HOSPITAL SERVICES

Prior to providing H/H services, the student’s parent or guardian can request H/H services by completing a locally developed form that must contain the following information:

- Student’s name
- Diagnosis
- Qualified medical practitioner’s signature, date, and anticipated weeks of absences
- Beginning date that H/H services would begin
- Whether or not the Individualized Education Program (IEP) team needs to meet

Attachment 1 to this bulletin contains an example of Request for Home/Hospital (H/H) form that can be used to develop a district or school form. A qualified medical practitioner is a:

- Doctor of Medicine (M.D.)
- Doctor of Osteopathy (D.O.)
- Doctor of Naturopathy (N.D.)
- Doctor of Dentistry (D.M.D.)
- Doctor of Chiropractic (D.C.)
- Physician Assistant (P.A.)
- Advanced Registered Nurse Practitioner (A.R.N.P.)
- Certified Nurse Midwife (C.N.M.)

The request for H/H services form is submitted to the district or school for approval, processing, and assignment of a tutor. Districts or schools should retain completed forms, as well as documentation of the actual number of weeks of H/H services for each student to support the H/H reimbursement claim. These records should be retained for six years and available for inspection by OSPI or educational service district staff/monitors and for audit by the Washington State Auditor’s Office (SAO).

HOME AND HOSPITAL REIMBURSEMENT

Once H/H services have begun, any missed school day can be claimed for H/H reimbursement. A school day that a student attends, regardless of the amount of time, may not be counted for H/H reimbursement. Reimbursement of H/H services will be provided by OSPI based on the number of weeks the student is absent from school. Weeks for H/H reimbursement are not calendar weeks. Rather every five missed school days count as one week of H/H services.

H/H funding for the months of September through June is paid based upon the projected amount reported to OSPI by the district, charter school, or tribal compact school on their F-203 (State Revenue Forecast).

H/H funding is adjusted in July based upon the actual weeks of H/H services reported to OSPI on Form E-525. The [2021–22 Form E-525](#) is due to OSPI by July 15, 2022. Instructions for completion of this form are on the back of Form E-525.

H/H reimbursement is \$55 for each week of tutoring for a student who is hospitalized or in a treatment center, and \$60 for each week of home tutoring.

RELATIONSHIP OF HOME AND HOSPITAL TO SPECIAL EDUCATION 504

Students receiving H/H services are expected to be unable to attend school because of physical and/or mental disability or illness for at least four weeks and no more than 18 weeks. All students with an illness or injury that meet the necessary requirements are eligible for H/H services. This includes:

1. Students receiving special education and related services under the Individuals with Disability Education Act (IDEA).
2. Students receiving accommodations, aids, and services under Section 504 of the Rehabilitation Act of 1973 (Section 504).
3. Students who are not eligible for special education or Section 504 services. Meeting H/H eligibility does not necessarily mean that a student is eligible for special education or Section 504 services. However, it is prudent to assess whether students might be eligible for such services when H/H services end.

Students eligible to receive special education or Section 504 services may access H/H services to the same extent as general education students. H/H services should be provided when necessary but shall not be used for the initial or ongoing delivery of services to students eligible for special education or Section 504 services. It shall be limited to services necessary to provide temporary intervention as a result of a physical and/or mental disability or illness. If a

parent, district, school, or other provider believes a student who is receiving H/H services may also meet the criteria for special education or Section 504 services, the district, charter school, or tribal compact school should ensure that referral procedures for special education and/or Section 504 services are followed.

INFORMATION AND ASSISTANCE

Additional information regarding home/hospital services can be found in the H/H Services Frequently Asked Questions at this [link](#).

Home/Hospital services are provided to students in their home or at a hospital. Districts are encouraged to consult their local health jurisdiction for specific precautions necessary to protect employees, students, and families from COVID-19 and refer to general guidance from the Department of Health regarding mitigation measures. The following resource for Home Health Workers may also be helpful; [820-088-HomeHealthAideGuidance-July2020 \(wa.gov\)](#)

For questions regarding this bulletin, please contact Annie Hetzel, Student Health Service Consultant, at 360-725-6054 or email annie.hetzel@k12.wa.us. The OSPI TTY number is 360-664-3631. This bulletin is also available on the [Bulletins](#) page of the OSPI website.
